Mc Donald's POS Transformation

Employee Database Management System

This project is used to manage employee database. This project is written in C programming language. The project maintains a Data Structure known as Doubly Circular Linked List. Each node of a Linked List maintains all the information of the employee. We can insert, delete, count, display employee's information. We can also search employee by his name, id, city, etc.

Airline Reservation System

This project is developed for customers who want to book online airline tickets. It is developed using Dot Net Core MVC & Dot Net Core WebAPI using Code First Approach and MS-SQL.

Other Projects : Alphabet Pattern Printing
